

Install Servisavor® in Lever Bypass Meter Socket

LP-4J-SP4559

The LP-4J-SP4559 lever bypass meter adapter is designed to be installed in a lever bypass meter base to allow installation of a Servisavor® Temporary Restoration Device.

The LP-4J-SP4559 can be installed in 200 A and 320 A meter bases, including those with a restricted opening in position #3.

The adapter has an opening allow installation of the pigtail neutral. Adapter allows closing of the lever and cover, and installation of the Servisavor® from the outside. Servisavor® adapter can be secured with a meter ring.
